

Free Online Tutoring

Academic Honesty Code

Overview

The Academic Honesty Code is Free Online Tutoring's policy on academic integrity. It details Free Online Tutoring's high standard for tutors and students in academic work.

Free Online Tutoring does not allow or participate in academic dishonesty in any form. This platform was designed to connect tutors with students in a free and accessible way. It is not a platform for tutors to do students' assignments or tests for them, nor is it permissible to provide answers without students doing the required work.

Free Online Tutoring encourages tutors and students to work together to problem-solve, build understanding of course materials, and empower students to learn effective studying techniques. The following details Free Online Tutoring's Academic Honesty Code and consequences for violating those guidelines.

Students

At Free Online Tutoring we understand the pressure of academic environments. Though School can be stressful, violating Free Online Tutoring's Academic Honesty Code by having a tutor complete your assignments and/or take your tests for you will lead to immediate suspension of your account and access to Free Online Tutoring's services.

Tutors

Just as students are expected to adhere to Free Online Tutoring's Academic Honesty Code, tutors are expected to uphold the policy as well. Completing assignments or providing answers to students does not empower them to understand the material in the long term. If a Student attempts to violate the Academic Honesty Code by asking you to complete their assignments and/or take tests for them, please advise us immediately. Violating Free Online Tutoring's Academic Honesty Code will lead to immediate suspension of your account and access to Free Online Tutoring's services.
